Olympia Electric 50

Folder
#1/22/006/11

Two indispensable office aids:
A first-class secretary
and a great typewriter

If you're someone's boss
Think how much that someone could use a typewriter worthy of their talents. Or think how their talents would improve given the incentive of an Electric 50. It makes good typists better, and better typists best.

If you're someone's secretary
Let them know what a whiz you'd be if they only gave you half a chance. An Electric 50 will make a big difference when the going gets rough. You need a good machine to help you out. And the boss knows he's better off when his right hand girl has a typewriter that's right.

If you're your own secretary
Isn't it time you gave yourself a real treat? Like a typewriter that you didn't mind sitting down to, to get all that work out. An Olympia Electric 50. It'll make the chore almost pleasant.

So you think all Electric Typewriters are alike.

Well, you're wrong
They have the same kind of variations as you'd find in two makes of automobiles.

With the Electric 50, you'll feel a difference. The kind of difference a driver can feel when he trades in the sedan for a responsive, highly engineered sports model.

You'll sense the workmanship that went into the Electric 50 when you put it through its paces. There's a certain precision, the instant response to any command you deliver. So that this finely honed achievement of technology is like an extension of its user.

And its heavy-duty construction is a work of art. An investment that will pay off in years of service free performance. This isn't just another typewriter for someone to bang on.

Behind this deluxe Olympia model is the largest office machine factory in Germany. A place where handcrafted quality is still a way of life.

You have our word that your words will come out looking better. And they'll come faster and easier. Because a quality machine gives its user that special lift, that little extra psychological push.

The mechanic in you will tell you right off that this is the typewriter you've been needing. The economist in you will tell you that it's the typewriter you shouldn't wait a minute longer to get working for you.

Check out an Olympia Electric 50 today and your whole future will profit.
